

## State of the Art Laser Therapy

**Therapeutic Laser Treatments** provide patients with a safe, effective and painless therapy that uses the body's own natural healing systems to relieve pain, increase joint mobility, increase tissue integrity and promote cell regeneration.

**Therapeutic Laser Therapy** offers treatment for both acute and chronic pain conditions. Within a short period of time, patients who have been incapacitated or restricted by pain for years regain the active and healthy lifestyles they knew before their injury or illness occurred.

Over 2,000 clinical studies worldwide have proven the success of therapeutic lasers in the healing of neural muscular-skeletal conditions.

FDA approved

### Common Treatable Conditions:

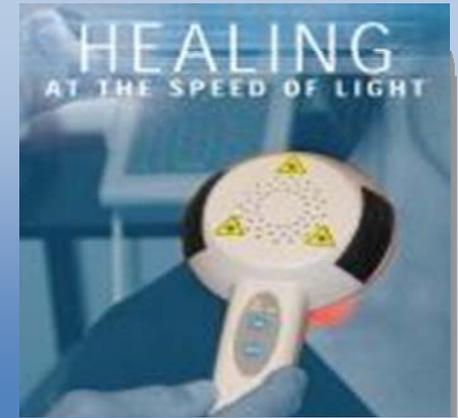

Low Back Pain  
Neck Pain  
Arthritis  
Heel Pain  
Shoulder Pain  
Tennis Elbow  
Knee Pain  
Tendinitis  
Sprains & Strains  
Carpal Tunnel Syndrome  
Hip pain  
Wound Healing  
Diabetic Ulcers  
Plantar Fasciitis  
Smoking Cessation  
Weight Loss  
and more...

*“Healing at the Speed of Light”*

*Discover...*

*How Laser Light Therapy can accelerate your Healing and reduce your Pain.*

*Call Today for your Appointment*

**305-295-9797**

The ONLY Non-Surgical  
Laser Technology available in  
the Keys!

Safe and Effective rehabilitation is our priority!

There are no harmful side effects. Therapeutic cold laser treatment is a non-invasive healing technique that only utilizes harmless, but effective light to stimulate deep tissue healing.

The laser can penetrate up to 2" into your tissue directly and 4" into your tissue indirectly. It will not damage cells; so even if the laser was used 24 hours a day it would not be able to harm you.

Clinically proven medical device that safely relieves pain and inflammation.

### *Frequently asked questions:*

#### *How Do Therapeutic Lasers Work?*

The procedure works by placing a small probe on the affected area which supplies energy to the body in the form of billions of photons of light. The body absorbs this laser light on a cellular level and transforms it into chemical energy effectively repairing itself.

The bio-stimulating effect of laser therapy causes a decrease in inflammation & pain and an increase in tissue regeneration & healing.

#### *How Long Does The Therapy Take?*

Treatment time will vary from as little as 2 minutes to as long as 20 minutes. The total number of treatments required varies depending on the body's natural healing rate and the severity of the condition. We will develop a treatment program specifically tailored to treat your condition.

#### *Therapeutic Laser Biological Effects:*

- Laser light accelerates cellular reproduction and growth
- Laser light stimulates tissue repair
- Laser light reduces the formation of scar tissue from: cuts, scratches, burns or post surgery
- Laser light reduces swelling caused by bruising or inflammation of joints
- Laser light increases blood flow to damages tissue
- Laser light speeds the process of nerve cell reconnection to bring numb areas back to life
